

Emerald Goddess Gardens

emeraldgoddessgardens.com

- Botanical Name: Aglaonema 'Lucky Red'
- Common Name: Luck Plant, Lucky Red Thai, Chinese Evergreen
- Plant Family: Arum
- Mature Size: 20 inches
- Growth Habit: Compact Bush
- Bloom Color: White, Green, Cream
- Bloom Form: Spadix
- Bloom Time: Spring
- Water Needs: Moderate
- Light Needs: High Light to Low Light
- Recommended Zones: 10, 11, 12
- Key Features: Vibrant Color Changing Leaves, Easy to Grow
- Suggested Uses: Interior Decor, Potted Specimen
- Growers Notes : All parts should be considered toxic! ***

Aglaonema 'Lucky Red' or Lucky Red Chinese Evergreen is a stunning cultivar with an interesting background in Asian superstition. Used for centuries as an indoor foliage accent, Aglaonema are returning to the spotlight as elegant new Thai hybrids are emerging. Luck Plants require very little care to maintain their vibrant beauty, which is thought to be the reason why they are known to bring good fortune and financial success in Chinese culture.

As Lucky Red Chinese Evergreen produces new leaves, they unfurl soft pink in color and darken to a true red in high light conditions. They will however, thrive in lower light conditions and maintain leaves that are a lighter blush pink color.

Whether you believe the tales of glory associated with the Luck Plant or simply adore their unique foliage, a little good fortune never hurt anyone. These beauties are an excellent way to bring stunning color and cheer to your interiorscape.

Direct planting of 4 inch starters is not recommended. For success with your new **Lucky Red Thai Aglaonema** follow these helpful tips:

- Plant in well draining soil.
- Locate in full sun or partial shade
- Provide supplemental irrigation until well established.
- Feed a good quality bloom boosting fertilize with the initial planting and yearly thereafter.
- Protect from frost and freeze until very well established.

If you don't know your USDA Planting Zone, you can check the map on our website site at emeraldgoddessgardens.com

Toxicity information generally known in the horticultural trade and gardening circles, if known, is provided for reference purposes only. Medical and/or Horticulture experts in the field of Plant Toxicology should be consulted for specific and reliable information. The absence of information does not mean or imply that a plant is not toxic, only that no information is generally known by us.

This plant is intended for ornamental, decorative use only. Emerald Goddess Gardens tm does not recommend, endorse, or offer the product for any other intended use.

Care of Your New Indoor Plant

Here are a few basic guidelines for handling and caring for your new plant:

Check the recommended USDA Zone Range for the plant. Many gardeners are able to successfully grow plants outside their recommended Zones, but this is dependent upon providing the type of environment and care the plant needs.

- Immediately remove your new plant from its packaging by removing any stakes or ties that have been used to protect it during shipping and removing packing crystals from the bottom of its pot.
 - Packing crystals may be reused to conserve water, but do so with caution as they hold 6000 times their weight in water. If reusing the crystals, mix and incorporate them thoroughly throughout the potting media.
- After allowing several days for acclimation, re-pot the plant into a pot at least one inch, but no more than three inches larger in diameter than the pot it was shipped in.
 - Decorative pots are often deceiving. Check to make sure that your new pot has drainage holes at the bottom that allow water to pass through with ease.
 - A non decorative plastic pot that has drainage is often placed inside a larger decorative pot to ensure adequate drainage while maintaining aesthetics.
- Use a good quality potting media. Many retail centers supply a potting mix specialized for potted gardening that is ideal.
 - Take care to avoid potting mixes advertised as 'moisture control' as these can lead to waterlogged roots.
- Supplement feed with a water soluble plant food every 2-3 weeks according to the label directions.
- Remove any leaves that were stressed or damaged during shipping. Some species such as Colocasia and Calathea have a central leaf chute that should not be cut until a new leaf emerges.
- Protect from frost and freeze, as even cold tolerant plants can be damaged by cold, and tropicals will perform better, flower earlier, and live longer within their Zone Range when protected from cold temperatures.

Many tropical and subtropical plants can be grown as potted plants indefinitely, and can be successfully wintered over, or adapted to growing indoors year round in colder climates. The most important factors to keep in mind when growing tropicals indoors are light, temperature, and humidity. Many popular indoor plants are native to rainforests and jungles where temperatures and humidity are high. To replicate this environment for successful growth place indoor plants in areas that are not near air conditioning vents, have exposure to bright indirect light, and supplement humidity with a humidifier as needed.

Full details of our Limited Conditional Arrive Alive Warranty are attached.

Ornamental Plants sold by Emerald Goddess Gardens are intended for use as ornamental decorative items only. Emerald Goddess Gardens does not recommend or endorse any other use.

Emerald Goddess Gardens® Limited Conditional Warranty:

Plants purchased from Emerald Goddess Gardens® are guaranteed to arrive alive and in good, healthy, viable condition. In the unlikely event, your order is lost or severely damaged in transit; we will either replace or refund your plant (at our option) if provided prompt and proper notice and photo validation as required to support claims with the carrier.

Some minor damage in shipping is sometimes an unavoidable part of the process, and is not considered to be a defect. Shippers can sometimes handle packages roughly, and despite our best efforts with packaging, a shipment can be damaged during the trip. Some minor issues are normal, expected, temporary, cosmetic and not considered to be a defect in the product, as the plant will quickly recover and grow normally, so please note:

- A few branches may break. It's ok. They will grow back.
- Some leaves may turn yellow and fall off. It's ok. They will grow back.
- A few spots may appear on the leaves. It's ok, the plants were treated regularly and immediately before shipping to protect against pest and disease, so light and fresh air will cure the problem

In the unlikely event, your plant sustains damage severe enough to affect its overall health and viability; just let us know right away as we offer a very high level of customer service and resolve problems quickly and courteously. We must have at least one photo showing:

1. The box with the address label visible,
2. The plant(s)
3. A brief explanation of the problem.

The carriers require this validation for claims that may be necessary on our end.

Failure to notify us within 24 hours of arrival, to provide photo validation, or proceeding with planting before contacting us voids this Warranty. Failing to promptly pick up your package from parcel lockers, post office boxes, or other drop points also voids this Warranty. For the fastest response and immediate access to our Customer Service Department, please contact us directly through our email at service@emeraldgoddessgardens.com

If necessary, we will either replace or refund the order (at our option). Because plants are perishable, living things, and there are many factors that determine whether live plants ultimately grow and thrive in their new environments that are out of our control. We are not able to guarantee the survival or growth of plants after they are delivered and planted, or their fitness or suitability for any particular purpose or environment. Therefore; no other, additional, extended, or long term warranty is offered, expressed, or implied.

We guarantee plants to be the species and cultivar as described in the listing, within recognized industry tolerances. We are cautious with tagging and handling, so this is not likely to happen. However, if you should notice something that causes you to wonder if we made a mistake, then send us a picture and a brief description of the concern.

The remedy under this Warranty is strictly limited to a one-time product replacement or refund of the purchase price, at our discretion.

Our liability under this Warranty, is strictly limited to the purchase price of the plant(s). Under no circumstances shall we be liable for damages in excess of the purchase price or any special, incidental, indirect, or consequential damages. Only purchased plants are covered by this Warranty. Gift plants are excluded.

Placement of the order and acceptance of the plants constitutes acceptance of these terms.

Returns:

Return shipping of perishable, live plants is generally not feasible or allowed under the policies of our State Department of Agriculture, except under very restrictive guidelines.

In the event of severe, verified, transit damage, as outlined in the Limited Warranty above, a return is generally not required. Please contact us for instructions within 24 hours of the delivery if you feel it is necessary to return live plants. All returns require prior authorization, must be returned in their original condition and in the original packaging, including gift and promotional items. Gift or promotional items included in the order without charge are not covered by this Warranty.
